**error logs** are occasional

logging is anticipated

Dylan Beattie 🇪🇺

One of the biggest challenges with centralized logging is establishing consensus about what log levels actually mean. Here's a quick primer.

```
log.Fatal Wake_Me_Up_At_4AM_On_A_Sunday()

Log.Error Apologize_To_User_And_Raise_A_Ticket()

log.Warn  Make_A_Note_In_Case_It_Happens_Again()

log.Info  Everything_Is_Fine_Just_Checking_In()

log.Debug Fill_My_C_Drive_With_Stack_Traces()
